Professional Summary

I'm a Computer Science student who loves getting my hands dirty with Full-Stack Development and AI automation. I've built scalable MERN apps, hooked up REST APIs, and created workflow automation systems from scratch. I care about solving tough problems and building smart, useful software.

Education

B.E. Computer Science and Engineering – Honors R.M.D Engineering College CGPA: 7.82 / 10	2023 – 2027 (Expected)
Master's Program in Software Engineering (MERN Stack) NxtWave CCBP 4.0 Intensive Program (Woolf University)	2024 – 2026

Technical Skills

Languages: JavaScript, Python, Java, C, C++, SQL
Frontend: React.js, HTML, CSS, Bootstrap
Backend: Node.js, Express.js
Database: MongoDB, MySQL
Tools: Git, GitHub, Postman, Google Cloud, Make.com

Projects

- React Portfolio Journey** [View Project](#)
○ I put together a collection of React apps that really show off my skills with state management, reusable components, and building UIs that look good on any device.
○ Each project tackles real-world problems and highlights smart frontend engineering. You'll see a lot of hands-on problem solving and my approach to best practices in action.
- Job Search Web Application** [View Project](#)
○ I created a job portal with React, using JWT for secure logins and protected routes.
○ The app connects to REST APIs for job listings, user profiles, and in-depth job descriptions.
○ I added advanced search filters, and the whole site stays responsive no matter what device you're on.
- Infinenix – AI Conversational Platform** [View Project](#)
○ I built a multi-persona AI platform that handles real-time voice responses and understands user intent.
○ FastAPI and React power the whole system, making the AI interactions feel natural and adaptive.
○ Each persona delivers unique, dynamic responses, so users stay engaged.
- AI Resume Evaluation System** [GitHub](#)
○ I built a modular, four-stage AI agent using Make.com, OpenAI, and Google Cloud to take the pain out of resume screening.
○ I hooked up a Telegram bot and added text parsing to pull structured data straight from Google Docs.
○ The system even sends out evaluation reports automatically thanks to Gmail API and workflow automation.

Certifications

- Node.js Fundamentals & Secure API Development – NxtWave
- Introduction to Databases & SQL – NxtWave
- Dynamic Web Application Development (JavaScript) – NxtWave
- Responsive Web Design (Bootstrap & CSS) – NxtWave

Achievements

- Secured **1st Place** in SQL Query Contest at RMK Engineering College.
- Solved **2000+** coding problems on SkillRack, demonstrating strong analytical and problem-solving skills.
